OBJECTIVE

Highly motivated and results-oriented aspiring Data Scientist with a strong foundation in data analysis and programming.

EDUCATION

B.tech in Artificial Intelligence Machine learning,

Gyan ganga institute of technology and sciences

Expected 2024

10 + 2 , St. Gabriel sen sec school

2018 - 2020

SKILLS

Technical Skills C++ , Python , Machine Learning , SQL, Flutter

Other Skills Power BI , Statistics , Git and GitHub

Soft Skills [Recommendations](#), Critical thinking , Problem-Solving , Business Acumen , Adaptability

EXPERIENCE

Flutter developer Intern

March 2022 - Aug 2022

Phaico

Noida

- Worked as a front-end flutter developer
- Worked with team for 3 client projects such as School Bus management system , Woocommerce application for retailers and online consulting application
- Added video chat feature in consulting application along with UI/UX Building and API integration for 3 mobile applications both ios and android

PROJECTS

YOURBOT : This project aims to develop a versatile AI chatbot that adapts to various roles and contexts, leveraging OpenAI's language models and Python's Flask framework. The chatbot will process user input, generate relevant responses, and simulate different personas

[Check out here!](#)

Avito-demand-prediction-Model : Developed a machine learning model to predict the probability of a deal being closed for Avito advertisements. This model will enable Avito to provide valuable insights to sellers, optimize resource allocation, and enhance user experience

[Check out here!](#)

ML-algorithm-for-stack-exchange : Machine learning model that accurately predicts various scores (e.g., question quality, answer quality, user reputation) on Stack Exchange based on user intent. This model will improve the overall user experience on the platform by identifying high-quality content and promoting community engagement
